- Plan and organize warehouse operations and processes to maximize efficiency. Responsibilities include inventory oversight (incoming and outgoing) based on physical count and bar-code system and retrieving, transferring, and shipping goods in accordance with company systems and controls.
- Maintain customer demand and order schedules making sure deliveries match customer purchase orders.
- Oversee optimal use of warehouse storage and floor space. Ensure that products / pallets are safely stacked and racked.
- Identify missing, lost, or damaged materials immediately notifying manager with key remediation plans.
- Collaborate cross functionally with Construction Managers to ensure customer needs are met in a timely fashion.
- Train, manage, and provide leadership to a team of employees to maintain morale and improve retention.
- Operate forklift, warehouse tools and equipment, and a 26-foot box truck for customer material deliveries.

TRANSGLOBAL TRINIDAD ENTERPRISES, INC.   Doral, FL
Warehouse Supervisor   *December 2017 – November 2020*

- Work closely with internal management to execute all planned process improvement programs and strategies.
- Manage effective relationships with key external agents such as freight forwarders, brokers, and delivery companies.
- Review and create Bills of Lading (BOL) daily for truckloads and Less than Truckload (LTL) shipments.
- Coordinate shipment operations including order pick-ups, loading / unloading inspection of all truck routes, and identification and resolution of any damaged freight issues.
- Train, participate, and lead in warehouse operations especially accurate data entry for all services performed in the Magaya automation system.
- Oversee monetary transaction paperwork ensuring timely and accurate completion in compliance with export laws.
- Implement and model the safety culture and strive for 100% compliance concerning safety policies and procedures.

PROJECTS

Easybank Landing Page | https://ericpatricio.github.io/easybank-landing-page/

- Responsive landing page created for a digital banking solution as part of a Frontend Mentor challenge. Created using HTML/CSS flexbox, CSS grid, SASS preprocessor, and JavaScript.

Meal Finder Web App | https://ericpatricio.github.io/meal-recipes-finder/

- Meal finder web application with the capability to search for and retrieve different recipes using certain keywords. Operates using MealAPI: reaches out the Api and returns a recipe using web technologies such as HTML, CSS, and JavaScript.

Task Manager | https://ericpatricio.github.io/tasks-management/

- A task planner web app where users can add, delete, and filter for specific tasks on their agenda. Built using Bootstrap, SASS, and JavaScript.

Registration Form | https://ericpatricio.github.io/register-form/

- A standard registration page that could be used for sign-up for different types of websites / subscription services. Built using HTML / CSS and JavaScript.
